Stock Price (Logarithmic Scale) vs Stock Price

Summary

- The Federal Fund Rate is a **key factor** for AMD's price movement, reflecting substantial effects in the short & long-term.
- Despite declining EPS from 2022 to 2024, the stock price rebounded due to **steady cash flow into the semiconductor sector** amplified by anticipation of future rate cuts.
- **AMD has maintained solid earnings** despite high interest rates and liquidity constraints, demonstrating operational strength.
- The log scale highlights AMD's long-term positive trend by smoothing out short-term volatility.
- Disclaimer: **Historical Performance ≠ Future Performance.** Past growth does not guarantee future returns.
